Signature 3-in-1 Oxygeneo Facial

Revolutionary technology that exfoliates, oxygenates, and infuses the skin, leaving it looking firm, youthful, and glowing. A non-invasive treatment that provides results that last.

This special technology uses CO2 bubbles in exfoliation to bring oxygen-rich blood to the surface. **This increases the metabolism of skin cells and promotes optimal absorption of nutrients including hyaluronic acid** – a natural smoothing and plumping agent found in popular injectable fillers. This process gives your skin a plumper, more hydrated look, with improved texture.

\$160

Clear and Bright Treatment
